

332 Short Interpregnancy Interval

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
332	Short Interpregnancy Interval		X		1	1	6			05/15

Kansas Risk Factor Definition

Interpregnancy interval of <18 months from the date of a live birth to the conception of the subsequent pregnancy.

[USDA Justification](#)

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
