

339a Hx Birth w/ Nutrition Related Birth Defect

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
339a	Hx Birth w/ Nutrition Related Birth Defect	X		X	1					04/01

Kansas Risk Factor Definition

Any history of giving birth to an infant who has a congenital or birth defect linked to inappropriate nutritional intake, e.g., inadequate zinc, folic acid, excess vitamin A. The infant's condition must be diagnosed by a physician as self-reported by client; or as reported or documented by a physician, or someone working under physician's orders.

[USDA Justification](#)

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
