

### 348 Central Nervous System Disorders

#### Kansas Risk Factor Summary

| Risk Factor Code | Kansas Risk Factor Title         | High Risk | Auto-Assigned | Based on MD Diagnosis | Category and Priority |    |    |   |   | USDA Revised Date |
|------------------|----------------------------------|-----------|---------------|-----------------------|-----------------------|----|----|---|---|-------------------|
|                  |                                  |           |               |                       | PG                    | BF | PP | I | C |                   |
| 348              | Central Nervous System Disorders |           |               | X                     | 1                     | 1  | 5  | 1 | 3 | 06/07             |

#### Kansas Risk Factor Definition

Presence of central nervous system disorders diagnosed by a physician as self-reported by client; or as reported or documented by a physician, or someone working under physician's orders. Central Nervous System Disorders are conditions which affect energy requirements, ability to feed self, or alter nutritional status metabolically, mechanically, or both. These include, but are not limited to:

- Epilepsy;
- Cerebral Palsy (CP);
- Neural tube defects (NTDs), such as spina bifida;
- Parkinson’s Disease; or
- Multiple Sclerosis.

#### [USDA Justification](#)

**Note:** USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
