

## Risk Factors Requiring Documentation of Physician Diagnosis – Pregnant

For the following risk factors the condition must be diagnosed by a physician as self-reported by client; or as reported or documented by a physician, or someone working under physician's orders. Self-reporting of a diagnosis by a medical professional should not be confused with self-diagnosis, where a person simply claims to have or to have had a medical condition without any reference to professional diagnosis. This should be documented by marking the [Risk Assigned Based on MD Diagnosis] check box on the Assign Risk Factors Window in KWIC.
