Breastfeeding:

- Greater than (>) 18 years of age
 - Hemoglobin less than (<) 12.0 g/dl
 - Hematocrit concentration less than (<) 35.7%
- Fifteen to less than (<)18 years of age
 - Hemoglobin less than (<) 12.0 g/dl
 - Hematocrit concentration less than (<) 35.9%
- Twelve to less than (<) 15 years of age
 - Hemoglobin less than (<) 11.8 g/dl
 - Hematocrit concentration less than (<) 35.7%

USDA Justification

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
