

312b Low Birth Weight Infant born at Last Delivery

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
312b	Low Birth Weight Infant born at Last Delivery		X			1	5			04/01

Kansas Risk Factor Definition

Birth of an infant born weighing ≤ 5 lb 8 oz (≤ 2500 grams) at the most recent delivery. KWIC will auto-assign if the woman is the linked mother of an infant who's recorded weight on the date of birth is less than or equal to 5 lb 8 oz.

[USDA Justification](#)

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
