

337 Hx Large for Gestational Age Infant Birth

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
337	Hx Large for Gestational Age Infant Birth		X*		1	1	6			04/04

Kansas Risk Factor Definition

Giving birth to an infant weighing \geq to 9 lbs. (4000 grams) at the most recent pregnancy, or history of giving birth to an infant weighing \geq to 9 lbs. (4000 grams). Must be diagnosed by a physician as self-reported by client; or as reported or documented by a physician, or someone working under physician's orders.

KWIC will auto-assign if the woman is the linked mother of any infants or children and the **Birth Weight** is greater than or equal to 9 lbs, or if History for Large for Gestational Birth or Large for Gestational Age Infant Born at Last Delivery was recorded during any previous certification.

*Staff must assess and manually assign if the woman was not previously enrolled in the Kansas WIC Program or previous data is not recorded in KWIC.

[USDA Justification](#)

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
