

427a Intake of Dietary Suppl. w/ Harmful Effects

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
427a	Intake of Dietary Suppl. w/ Harmful Effects				4	4	6			07/09

Kansas Risk Factor Definition

Consuming inappropriate or excessive amounts of dietary supplements not prescribed by a physician. Including:

- Single or multiple vitamins;
- Mineral supplements; and
- Herbal or botanical supplements/remedies/teas.

[USDA Justification](#)

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
