

## 427d Inadequate Vitamin/Mineral Supplementation

### Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
427d	Inadequate Vitamin/Mineral Supplementation				4	4	6			07/09

### Kansas Risk Factor Definition

Inadequate vitamin/mineral supplementation recognized as essential by national public health policy. Including:

- Consumption of less than 150  $\mu\text{g}$  of supplemental iodine per day.
- Consumption of less than 400  $\mu\text{g}$  of folic acid from fortified foods and/or supplements daily.

### [USDA Justification](#)

**Note:** USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
