

602 Potential Breastfeeding Complications

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
602	Potential Breastfeeding Complications	X				1				05/15

Kansas Risk Factor Definition

A breastfeeding woman with any of the following complications or potential complications for breastfeeding:

- severe breast engorgement
- recurrent plugged ducts
- mastitis (fever or flu-like symptoms with localized breast tenderness)
- flat or inverted nipples
- cracked, bleeding or severely sore nipples
- Age ≥ 40 years
- Failure of milk to come in by 4 days postpartum
- Tandem nursing (breastfeeding two siblings who are not twins)

USDA Justification

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
