Kansas Risk Factor Definition
Developmental, sensory or motor disabilities that restrict the ability to consume chew or swallow food or require tube feeding to meet nutritional needs. Disabilities include but are not limited to:
- minimal brain function;
- feeding problems due to a developmental disability such as pervasive development disorder (PDD) which includes autism;
- birth injury;
- head trauma;
- brain damage; or
- other disabilities.

USDA Justification
Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
