

135 Slowed/Faltering Growth Pattern

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
135	Slowed/Faltering Growth Pattern	X	X					1		06/16

Kansas Risk Factor Definition

Infants Birth to 2 weeks	Excessive weight loss after birth, defined as $\geq 7\%$ birth weight
Infants 2 weeks to 6 months	Any weight loss. Use two separate weight measurements taken at least eight weeks apart. This can include birth weight.

KWIC will auto-assign based on the infant's current age and age of anthropometric measures.

[USDA Justification](#)

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
