

342 Gastrointestinal Disorders

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
342	Gastrointestinal Disorders			X	1	1	5	1	3	07/09

Kansas Risk Factor Definition

Presence of gastrointestinal disorders diagnosed by a physician, as self-reported by caregiver; or as reported or documented by a physician, or someone working under physician’s orders. Gastrointestinal disorders are diseases and/or conditions that interfere with the intake, digestion, and/or absorption of nutrients. The diseases and/or conditions include, but are not limited to:

- Gastroesophageal reflux disease (GERD);
- Peptic ulcer;
- Post-bariatric surgery;
- Short bowel syndrome;
- Inflammatory bowel disease, including ulcerative colitis or Crohn's disease;
- Liver disease;
- Pancreatitis; or
- Biliary tract diseases.

USDA Justification

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
