

348 Central Nervous System Disorders

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
348	Central Nervous System Disorders			X	1	1	5	1	3	06/07

Kansas Risk Factor Definition

Presence of central nervous system disorders diagnosed by a physician as self-reported by caregiver; or as reported or documented by a physician, or someone working under physician's orders. Central Nervous System Disorders are conditions which affect energy requirements, ability to feed self, or alter nutritional status metabolically, mechanically, or both. These include, but are not limited to:

- Epilepsy;
- Cerebral Palsy (CP);
- Neural tube defects (NTDs), such as spina bifida;
- Parkinson’s Disease; or
- Multiple Sclerosis.

[USDA Justification](#)

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
