

349 Genetic and Congenital Disorders

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
349	Genetic and Congenital Disorders	X PG, BF I, C only		X	1	1	5	1	3	04/01

Kansas Risk Factor Definition

Presence of a hereditary or congenital condition at birth that causes physical or metabolic abnormality, such as genetic and congenital disorders as diagnosed by a physician as self-reported by caregiver; or as reported or documented by a physician, or someone working under physician’s orders. The current condition must alter nutrition status metabolically, mechanically, or both. May include, but is not limited to:

- Cleft lip or palate;
- Down’s syndrome;
- Thalassemia major;
- Sickle cell anemia (not sickle cell trait); and
- Muscular dystrophy.

[USDA Justification](#)

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
