

352b Infectious Diseases-Chronic

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
352b	Infectious Diseases-Chronic	X		X	1	1	3	1	3	06/16

Kansas Risk Factor Definition

Conditions likely lasting a lifetime and require long-term management of symptoms. Infectious diseases come from bacteria, viruses, parasites, or fungi and spread directly or indirectly from person to person. Infectious diseases may also be zoonotic, which are transmitted from animals to humans, or vector-borne, which are transmitted from mosquitoes, ticks, and fleas to humans. These diseases and/or conditions include but are not limited to the following table.

An extensive listing of infectious diseases can be found at

<https://medlineplus.gov/infections.html>.

Common Chronic Infectious Diseases	
HIV-Human Immunodeficiency Virus	Hepatitis B
AIDS-Acquired Immunodeficiency Syndrome	Hepatitis C
	Hepatitis D

Presence of condition diagnosed by a physician as self-reported by the client/caregiver; or as reported or documented by a physician or someone working under a physician’s orders.

USDA Justification

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
