

411k Inadequate Vitamin/Mineral Supplementation

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
411k	Inadequate Vitamin/Mineral Supplementation							4		05/17

Kansas Risk Factor Definition

Routinely not providing vitamin/mineral supplements as recognized as essential by national public health policy when an infant’s diet alone cannot meet nutrient requirements. Such as:

- Infants who are 6 months of age or older who are ingesting less than 0.25 mg of fluoride daily when the water supply contains less than 0.3 ppm fluoride; and
- Breastfed infants who are ingesting less than 1 quart per day of vitamin D fortified formula and are not taking a supplement of 400 IU of vitamin D; and
- Non-breastfed infants who are ingesting less than 1 quart per day of vitamin D fortified formula and are not taking a supplement of 400 IU of vitamin D.

USDA Justification

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
