

411f Improperly Diluted Formula

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
411f	Improperly Diluted Formula							4		05/17

Kansas Risk Factor Definition

Routinely feeding inappropriately diluted formula.

- Failure to follow manufacturer’s dilution instructions (to include stretching formula for household economic reasons).
- Failure to follow specific instructions accompanying a prescription.

[USDA Justification](#)

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
