

603 Potential Breastfeeding Complications

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
603	Potential Breastfeeding Complications	X						1		04/01

Kansas Risk Factor Definition

A breastfed infant with any of the following complications or potential complications for breastfeeding:

- Jaundice;
- Weak or ineffective suck;
- Difficulty latching onto mother’s breast; or
- Inadequate stooling (for age, as determined by a physician or other health care professional), and/or less than 6 wet diapers per day.

[USDA Justification](#)

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
