

## 201e Low Hemoglobin/Hematocrit

### Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
201e	Low Hemoglobin/Hematocrit	X	X					1	3	05/15

### Kansas Risk Factor Definition

Children greater than or equal to 24 months of age

- Hemoglobin less than (<) 11.1 g/dl
- Hematocrit concentration less than (<) 33%

Children 12 - <24 months of age

- Hemoglobin less than (<) 11.0 g/dl
- Hematocrit concentration less than (<) 32.9%

Children 6 - <12 month of age

- Hemoglobin less than (<) 11.0 g/dl
- Hematocrit concentration less than (<) 33%

### [USDA Justification](#)

**Note:** USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
