

346 Renal Disease

Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
346	Renal Disease	X		X	1	1	3	1	3	04/01

Kansas Risk Factor Definition

Presence of renal disease diagnosed by a physician as self-reported by caregiver; or as reported or documented by a physician, or someone working under physician’s orders. Any renal disease including pyelonephritis and persistent proteinuria but excluding urinary tract infections (UTI) involving the bladder.

[USDA Justification](#)

Note: USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
