### Kansas Risk Factor Definition

Routine ingestion of non-food items. Examples of inappropriate nonfood items including:

- Ashes;
- Carpet fibers;
- Cigarettes or cigarette butts;
- Clay;
- Dust;
- Foam rubber;
- Paint chips;
- Soil; and
- Starch (laundry and cornstarch).

### [USDA Justification](#)

**Note:** USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
