

## 501a Possibility of Regression of Hemoglobin/ Hct

### Kansas Risk Factor Summary

Risk Factor Code	Kansas Risk Factor Title	High Risk	Auto-Assigned	Based on MD Diagnosis	Category and Priority					USDA Revised Date
					PG	BF	PP	I	C	
501a	Possibility of Regression of Hemoglobin/ Hct								3	06/18

### Kansas Risk Factor Definition

A child who is reapplying for WIC benefits and currently assigned the risk factor “Low Hemoglobin/Hematocrit” when the CPA determines there is a possibility of regression in nutritional status without WIC benefits.

- The client must be fully screen to identify risks;
- The risk factor may not be used in combination with any other priority 3 risk factor; and
- May only be used for the next certification period.

### [USDA Justification](#)

**Note:** USDA Justification is provided because it explains nicely why the risk is important. However, you must use the Kansas risk factor names and definitions which may differ slightly from the USDA document.
