

THE BENEFITS OF A TRAUMA SYSTEM

— Every Minute Counts —

Trauma Systems increase the chances of survival by strengthening the relationships between local health departments as injury prevention advocates, trained community bystanders, EMS, trauma centers, and rehabilitation services. The stronger these relationships, the more innovative and creative the Kansas Trauma System becomes when improving the quality of care and outcomes for injured Kansans.

Trauma-Trained Staff

Trauma-trained staff's efficient response saves time.

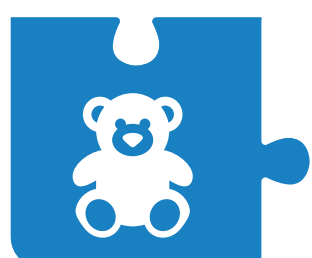

Injury Data

Data tells us what training and equipment you need. Preparation saves time.

Access to Trauma Centers

More hospitals designated as trauma centers shorten transport distances. Short transport saves time.

Pediatric Trauma

Anyone with children knows pediatric trained professionals save time.

Trained Communities

The average time to bleed out is 2-5 minutes. Train your community to #StoptheBleed

The Golden Hour

Prompt medical care in the FIRST hour after injury can prevent death. Every minute counts.

Triage Best Practices

When EMS know which hospitals can best care for a traumatic injury it saves time.

Every Minute Counts

Strong collaboration saves time.
