

TEAM-BASED CARE IN KANSAS

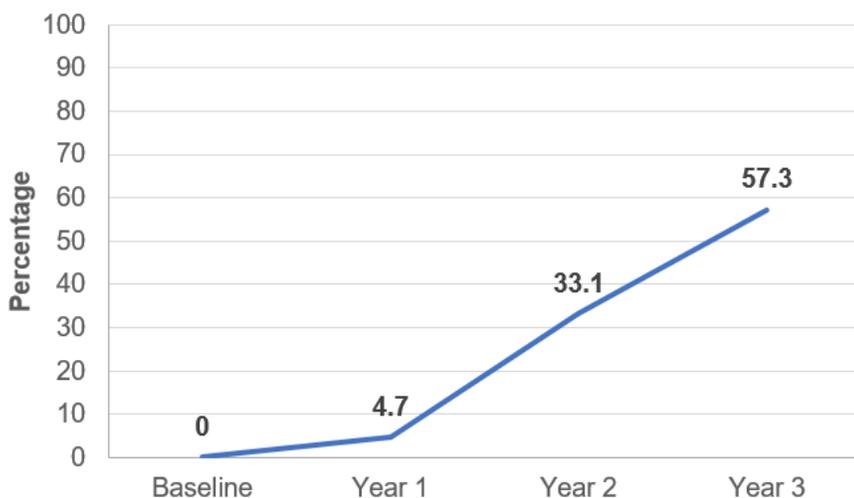

Updated 2022

Team-based care is a strategy implemented at the health system level. Team-based care aims to enhance patient care by having health professionals from different disciplines work collaboratively with the patient and the patient's primary care provider. Team-based care includes the engagement of non-physician team members, such as nurses, physician assistants, medical assistants, pharmacists and community health workers. Strategies that team members can use to implement team-based care to improve blood pressure and cholesterol control include the following:

- Patient follow-up;
- Medication management;
- Self-management support; and
- Self-measured blood pressure (SMBP) monitoring.

Team-Based Care for Hypertension

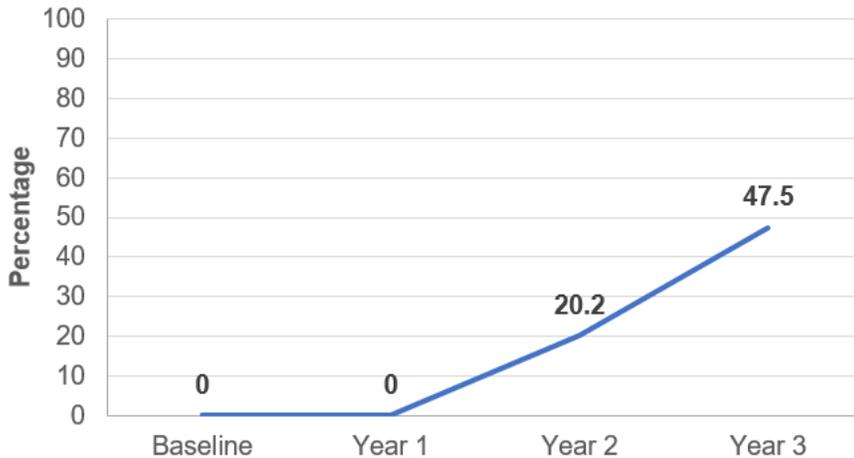

Percent of patients in health care systems implementing new or enhanced team-based approaches or policies to address blood pressure control

The percent of patients in health care systems implementing new or enhanced team-based approaches or policies to address blood pressure control has steadily increased from baseline to Year 3 from 0.0% to 57.3%.

Team-Based Care for High Cholesterol

Percent of patients in health care systems implementing new or enhanced team-based approaches or policies to address cholesterol management

The percent of patients in health care systems implementing new or enhanced team-based approaches or policies to address cholesterol management increased from baseline to Year 3 from 0.0% to 47.5%.

More about Community Clinical Linkages

The Community Clinical Linkages (CCL) Section within the Bureau of Health Promotion was awarded the 1815-*Improving the Health of Americans Through Prevention and Management of Diabetes and Heart Disease and Stroke* Cooperative Agreement in 2018. The purpose of this Agreement in our state is to improve the health of Kansans through the prevention and management of diabetes, heart disease, and stroke. The goal of CCL is to facilitate the connection between community and clinical settings to improve health outcomes.
