Dear Health Care Professional:

Mother’s milk is the preferred food for infants. If infant formula becomes necessary, only certain formulas are available through the WIC Program. To contain program costs and serve more women, infants, and children, federal regulations require that WIC programs sign a contract with an infant formula manufacturer to provide specific standard formulas. The Kansas WIC program has contracted with Abbott Laboratories to provide the following as standard formulas for healthy infants from birth through twelve months of age whose mothers choose not to breastfeed or who partially breastfeed.

- Similac Advance,
- Similac Sensitive,
- Similac for Spit Up,
- Similac Total Comfort, and
- Similac Soy Isomil

Infants will not be issued any other brands of standard milk-based formula, including lactose free and added rice starch, or soy-based infant formulas.

The WIC Program will provide other exempt or “special” formulas or WIC-eligible nutritionals to WIC clients if there is a documented medical diagnosis for which the formula is intended. The WIC Program will not issue any formulas or WIC-eligible nutritionals simply to enhance nutrient intake or manage body weight without an underlying medical condition.

If an infant, child, or a pregnant, breastfeeding or postpartum woman in your care requires a special formula, complete and sign the form on the reverse side of this letter. The request for a special formula must be renewed each WIC certification period. Infants are usually certified until their first birthday. Certification periods for children are generally 12 months. A new form is required any time the special formula is changed.

Please visit the Kansas WIC website to see a list of the products WIC can provide at:

Federal regulations determine the maximum amount of prescribed formula or medical food provided by WIC and is outlined in Kansas WIC Program policies. WIC is a supplemental program. Patients are responsible for acquiring any additional quantities of formulas or medical foods that exceed WIC allowances, potentially through insurance or medical card.
