**KANSAS INFORMATIONAL NOTICE 98-13      CLARIFICATION OF REVISIONS OF  
OF 10 CFR Part 34 FOR REVIEW  
BY LICENSEES FOR APPLICABILITY  
TO CURRENT LICENSED ACTIVITIES.**

**Addressees:**

All Industrial Radiography Licensees

**Purpose:**

The Kansas Radiation Control Program received the enclosed notice from the U.S. Nuclear Regulatory Commission (NRC) regarding the revision of 10 CFR Part 34 that was published February 28, 1998 and became effective on June 27, 1998.

**Description of Circumstances:**

This revision introduced a number of changes affecting industrial radiography operations. On January 15 and February 28, 1998, representatives from Region IV attended meetings of the American Society of Nondestructive Testing to discuss these changes. Through discussions with licensee participants in attendance at these meetings, it was apparent that further clarification was needed regarding (1) activities that a licensee may conduct at locations identified on its licenses, and (2) the content of licensee notifications pursuant to 10 CFR 34.101(c). The following guidance from NRC's Office of Nuclear Materials Safety and Safeguards is being provided to help clarify these issues.

**Discussion:**

See attachment NRC INFORMATION NOTICE Dated April 17, 1998

This informational notice does not require any specific action or written response. If you have any questions about the information in this notice, please do not hesitate to contact this office.

Sincerely,

Ivan P Schmidt  
Radiation Control Inspector  
Bureau of Air and Radiation  
Radiation Control Section
